

To whom it may concern,

I work for Adecco Permanent Placement agency in Luxembourg.

I am in charge of recruitment for an international company with a great reputation and innovative technologies. They have a big project and they ask us to help them to find several profiles on **permanent contract basis**.

We are currently looking for :

- senior electromechanical technician
- senior electromechanical team leader
- senior automation technician
- senior quality technician

Candidates must have 5 years' experience in a similar position and in an industrial environment and be graduated in electro-mechanical.

I would like to know who is the person in contact with alumni and how we can collaborate.

Best regards,

Tiziano
