

Position Title: **Control Panel Operator**

Location: **Patras Cement Plant**

TITAN Greece has an excellent opportunity for a Control Panel Operator for our cement plant in Patras, Greece. The position reports directly to the Grinding, Packing, Port & Raw Materials Manager. The primary scope of this role is to work in a team environment ensuring the safe and uninterrupted operation of the plant in order to achieve productions targets, product quality and maximize operational efficiency.

### **Main Responsibilities**

- Monitor the central control panel, computer terminals or other control systems and resolve plant-related issues associated with equipment temperatures, malfunctions, sensor alarms and plant production
- Control all major process lines within the cement manufacturing operation including equipment commissioning, starts- ups, shutdowns and emergency condition management as per established SOP in order to meet production requirements
- Observe operation of equipment to ensure continuity of flow, safety and efficient operation and to detect malfunctions
- Monitor and optimize plant performance and inform the Shift Supervisor based on independent judgement of indications and alarms
- Coordinate with the Quality Control Department to troubleshoot, inspect, and maintain plant equipment as required to meet production demands and prevent failures.
- Monitor plant equipment for abnormal operation taking corrective action as necessary following the instructions from the Plant Management team
- Participate in the daily production schedule
- Maintain safe and clean work area at all times; Ensure workplace safety through implementation, adherence and enforcement of company business standards, as well as safety and development programs

### **Candidate Profile**

- TEI Graduate in Mechanical, Electronic, Electrical or Automation Engineering
- 3 years of experience within a manufacturing facility with exposure to plant equipment and operations and/or maintenance or instrumentation or automation; Knowledge of the cement manufacturing process and the automated batch plant operation will be considered an asset
- Ability to work rotating shifts and holidays
- Proficient planning, organization and time management abilities
- Proactive attitude toward solving problems and ability to exercise discretion and good judgment
- Must have excellent interpersonal, verbal and written communication skills.
- Safety-minded and team oriented attitude
- Good working knowledge of Microsoft Office
- Fluent in English
- Military obligations fulfilled for male candidates
